

Walla Walla County Public Health

Prevent • Promote • Protect

Mission

The mission of the Walla Walla County Health Department is to improve the quality of life for our community through disease prevention, health promotion and public health protection programs.

Vision

Walla Walla County Health Department...Empowering people to build a healthy, safe and sustainable community.

Values

- We are here to make a positive difference in our community
- We serve our community and each other
- We are all public health professionals
- We treat our patients, clients, and each other with compassion and respect
- We hold ourselves accountable
- We value diversity in people and ideas
- We value open communication and a positive attitude
- We value community collaboration and partnership

Goals

- Maintain a complete and fully documented environmental health and safety program. (EH)
- Identify impediments involving access to care and solutions to help ameliorate those impediments. (AC)
- Assessment and continuous quality improvement will be a part of each program in WWCHD. (AS)
- Maintain a complete and fully documented communicable disease program, including procedures, protocols and communication tools. (CD)
- Develop, implement and maintain a community health improvement plan. (PP)
- Develop programs that enhance staff achievement, financial soundness and technological support. (AD)
- Maintain our intra-departmental team. (AD)
- Support regionalization where appropriate. (AD)
